

DEEKSHITH J

AI & MACHINE LEARNING ENGINEER | OPENAI x NXTWAVE FINALIST

Email: deekshithj188@gmail.com | Phone: +91 95358 92361 | Bengaluru, India | GitHub: @deekshith | LinkedIn: in/deekshith-j

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Data Science. Driven AI/ML engineer focused on engineering grounded Retrieval-Augmented Generation (RAG) architectures, autonomous agent workflows, and reliable backend systems using Python, LangChain, and LangSmith. Experienced in reducing hallucinations and optimizing LLM

HONORS & NATIONAL RECOGNITIONS

OpenAI x NxtWave Buildathon Finalist National Level

- â€¢ Competed among top student developer teams across India to architect and build an autonomous AI-driven application.
- â€¢ Engineered rapid prototyping, prompt grounding, and API integrations under rigorous hackathon constraints.

FEATURED AI & SOFTWARE PROJECTS

Smart Queue Management System | Python, Artificial Intelligence

- â€¢ Developed an intelligent queue and token scheduling platform reducing physical wait times in high-traffic environments.
- â€¢ Implemented automated customer prioritization scoring and real-time dynamic queue rebalancing algorithms.

AI Scholarship Recommendation Agent | Python, LLMs, Prompt Engineering

- â€¢ Built an intelligent recommendation agent that analyzes student eligibility criteria and maps optimal scholarship opportunities.
- â€¢ Designed specialized system prompts and context extractors to provide structured, explainable match justifications.

Enterprise HR Agent | Python, RAG, LangChain, LangSmith

- â€¢ Engineered an end-to-end Retrieval-Augmented Generation (RAG) assistant for complex company policy and HR knowledge bases.
- â€¢ Integrated LangSmith tracing and evaluation pipelines to monitor latency, inspect token usage, and eliminate hallucinations.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS

AI & LLM Frameworks: RAG (Retrieval-Augmented Generation), LangChain, LangSmith, Prompt Engineering, Vector Stores

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, API Design, System Architecture, Git/GitHub

EDUCATION

Bachelor of Technology (B.Tech) â€” Artificial Intelligence and Data Science

Sanjay Ghodawat University | 2025 â€” 2029 (Expected)

Focus: Autonomous Agents, Deep Learning Foundations, Distributed Data Systems, Advanced Algorithms

CERTIFICATIONS

- â€¢ Generative AI & Large Language Models â€” DeepLearning Academy (Prompt Engineering & RAG Pipelines)
- â€¢ Python for Data Science â€” DataScience Institute (NumPy, Pandas & Analytical Data Processing)
- â€¢ LangChain & LangSmith Agent Frameworks â€” Advanced Observability & Evaluation for Production LLMs
